### EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Gregory Einhorn on 22 August 2005.

2. Please amend the claims as follows:
  - a. Claim 86, line 1, insert the phrase --biomolecular solder-- between "A" and "composition".
3. Claims 1-16, 19-22 and 24-94 are allowed.
4. The following is an examiner's statement of reasons for allowance: the instantly claimed invention is free of the prior art wherein the process of manufacture distinguishes the biomolecular solder by changing the structure and physical characteristics of the solder wherein the pre-denaturing of the solder leads to a decreased saline solubility. This leads to a cross-linking of solder on itself that makes the solder effective in situ at a relatively low protein concentration as compared to the prior art. Upon immersion in a hydrating solution, the claimed product hydrates and becomes elastic. There is no loss of proteinaceous material to the solution as compared to solders in the prior art that require much higher percentages of proteinaceous materials to avoid the solubility issues. Thus, the instantly claimed invention is distinguished from the prior art.
